

Exercises week 1

Christian Vedel, Department of Economics, SDU

2025-02-05

This first set of exercises are mostly intended to get you up to speed with exercises, allow you to get a slow an easy start for statistics

1. Find “Ice_cream_kills.xlsx”

We also worked with this in class :-)

Solve by yourself or in group:

- Can you plot the relationship between the sale of ice creams and drowning accidents?

To discuss in class:

- What conclusion can you draw? Why? Why not?
- Are there any general takeaways here regarding statistics?
- Is statistics still useful

2. Analysis Tool Pak

- *See NKS Notes 1: “An Introduction to Statistics” p. 8 (can be found on itslearning)*
- *Follow the instructions to install Analysis Tool Pack*

3. Please go to your favorite news outlet and find an interesting number

- Can you trust the number you found?
- Why? Why not?
